EDUCATION

University of California San Diego (UCSD)

Master of Science (M.S) – Machine Learning & Data Science

September 2023 – Present

San Diego, USA

Pune Institute of Computer Technology (PICT)

Bachelor of Engineering (B.E.) – Electronics & Telecommunication – GPA: 3.9/4.0

July 2019 – June 2023

Pune, India

TECHNICAL SKILLS

Programming Languages & Software Development – Python, R, C++, Matlab, Javascript, Git, Linux, CI/CD

Data Science & Machine Learning – PyTorch, TensorFlow, Keras, Scikit-Learn, LLMs, Linear Algebra, Statistics

Data management & Databases – SQL, MySQL, PostgreSQL, MongoDB, NoSQL, ETL

Cloud & Big Data – AWS, Google Cloud, Docker, PySpark, Hadoop

Specialized Tools & Libraries – Tableau, NLTK, OpenCV, Scipy, CUDA, MLFlow

WORK EXPERIENCE

Machine Learning Engineer

Qualcomm Institute - UC San Diego Division of Calit2

July 2024 – Present

San Diego, USA

- Co-developed "Waldo", an **open-source** NLP tool with 97.9% test accuracy in detecting adverse events from over 360,000 Reddit posts, advancing **automated drug surveillance**.
- Applied **data mining**, **forecasting**, and **anomaly detection** to uncover public health trends; identified a 23% rise in gambling addiction-related searches post-Murphy v. NCAA, guiding targeted business efforts.

Machine Learning Researcher

University of California San Diego

March 2024 – June 2024

San Diego, USA

- Developed and implemented a **novel RNA image segmentation technique** that achieved an Intersection over Union (IoU) **greater than 70%** across nearly 300 individual cells, facilitating more precise biological analyses and insights.
- Accelerated the segmentation algorithm by leveraging **parallel GPU processing**, decreasing the processing time by 300% and **reduced CPU overhead** by 19.5 hours for a dataset comprising 2.2 million molecules.

Research Intern - Computer Vision

Indian Institute of Technology (IIT) Patna

December 2022 – August 2023

Remote

- Created a new dataset by utilizing advanced **image augmentation** techniques to generate high-quality synthetic data, thereby expanding the dataset size to 100,000 images (**30% increase**), improving robustness of the model.
- Tailored a **Vision Transformer** architecture to address edge-case scenarios in traffic sign detection, beating the **state-of-the-art** F1 score by 9%; *paper accepted at CVMI 2024*.

Machine Learning Engineer - Recommender Systems

RhythmFlows Solutions Pvt. Ltd

August 2022 – April 2023

Pune, India

- Led **A/B testing** comparing content-based and collaborative filtering, achieving a **33% boost** in relevant recommendations. **Deployed** the model on **AWS Sagemaker** with continuous updates for improved performance.
- Reduced document processing time by 7 seconds per document by utilizing **Pytesseract OCR** for electronic receipt scanning, and revamped the data analysis pipeline, **minimizing human effort by 30%**.

Data Scientist - Product

Atomic Loops

January 2022 – June 2022

Pune, India

- Spearheaded a team of three in training a **YOLOv5** food detection model achieving **98% precision** which was then integrated with a **food train system**.
- Collaborated with the data platform team to construct preprocessing pipelines, facilitating a notable **20% acceleration** in **project delivery** rate, thereby **enhancing** overall **business efficiency** by **33%**.

PROJECTS

End-to-End Text Summarizer | Transformers, NLP, GitHub Actions

July 2024 – July 2024

- Built a text summarizer for concise summaries, managing the entire workflow from configuration to deployment.
- Automated CI/CD with AWS and GitHub Actions, handling Docker, EC2, ECR, and runner setup.

Retail Vision Enhancement | YOLOv8, SuperGlue, Docker

February 2024 – February 2024

- Implemented YOLOv8 for object detection, achieving over 90% accuracy in labeling on-shelf retail products.
- Introduced SuperGlue for precise product identification, and created a Dockerfile to ensure cross-platform reproducibility.
